Hellmuth Fischer Medal - Call for Nominations

<http://www.dechema.de>

DECHEMA Deutsche Gesellschaft für Chemisches Apparatewesen, Chemische Technik und Biotechnologie is pleased to invite entries for the fifth award of the Hellmuth Fischer Medal.

Preference is given to younger scientists for work that has contributed towards extending or deepening the fundamentals of electrochemistry, corrosion or corrosion protection, or towards their industrial application. Previous medalists were Prof. Dr. Ulrich Stimming, New York, in 1989, Priv.-Doz. Dr. Klaus-Michael Jüttner, Frankfurt am Main, in 1991, Dr. Roger Charles Newman, Manchester, in 1994 and Dr. Philippe Allongue, Paris, in 1997.

Nominations should be accompanied by a curriculum vitae, reprints of important publications, a list of publications and a brief statement of the reasons for the nomination (approximately 1 typewritten page). It is not possible for candidates to nominate themselves. Nominations should be submitted by 29, October, 1999 to:

Prof. Dr. G. Kreysa

DECHEMA e.V.

P.O. Box 15 01 04

D-60061 Frankfurt am Main, Germany

The final decision on the award of the 2000 Hellmuth Fischer Medal lies with the Selection Committee composed of six distinguished scientists. The medal will be presented on the occasion of the 8th International Fischer Symposium on "Electrochemistry and Environment", which will take place at the University of Karlsruhe from 18–22 June 2000.

Carl Wagner Medal of Excellence

The first edition of the new Carl Wagner medal was presented to Dr Karel Bouzek of the Institute of Chemical Technology, Prague, during the 5th European Symposium on Electrochemical Engineering held at Exeter University, UK in March 1999.

The medal is awarded by the Working Party on Electrochemical Engineering of the European Federation of Chemical Engineers and was presented to Dr Bouzek by Professor Hartmut Wendt, immediate past chair of the Working Party. The medal competition attracted a total of six nominations and the judges were impressed by the quality of all the candidates put forward.

Dr Karel Bouzek has a growing reputation for his work in fields such as iron oxidation, effluent treatment, reactor modelling and particulate electrodes. He is a product of the late Professor Ivo Rousar at ICT, Prague. We congratulate Dr Bouzek on his award.

BOOK REVIEWS

Subject areas relevant to the Journal's interests include: environmental electrochemistry, recycling and removal

of contaminants; batteries, fuel cells and electrochemical energy conversion; corrosion and protection of metals; electrosynthesis (of organics, inorganics, metals, alloys, polymers, ceramics and composites); electrocatalysis; photo- and semiconductor electrochemistry; electrochemical engineering and reactor design; electrode materials and coatings; electrochemical sensors and monitors.

Publishers are invited to send copies of new books to the News Editor: Professor Frank Walsh, Applied Electrochemistry Group, School of Pharmacy & Biomedical Sciences, University of Portsmouth, St Michael's Building, White Swan Road, Portsmouth PO1 2DT, UK, for review in this journal.
